

## SUMO-1

**Catalog Number:** 21236

**Gene Symbol:** SUMO1

**Description:** Anti-SUMO-1 Rabbit polyclonal Antibody

**Background:** Small Ubiquitin-like Modifier or SUMO proteins are a family of small proteins that are covalently attached to and detached from other proteins in cells to modify their function. SUMOylation is a post-translational modification involved in various cellular processes, such as nuclear-cytosolic transport, transcriptional regulation, apoptosis, protein stability, response to stress, and progression through the cell cycle. There are 3 confirmed SUMO isoforms in humans: SUMO-1, SUMO-2 and SUMO-3. SUMO-2 and -3 show a high degree of similarity to each other and are distinct from SUMO-1.

**Immunogen:** A synthetic peptide corresponding to residues near the C-terminal of human SUMO-1.

**Tested applications:** ELISA, WB, IHC, IP

**Recommended dilutions:**

ELISA: 1:1000-1:5000

WB: 1:100-1:1000

IHC: 1:50-1:100

**Concentration:** 1 mg/ml

**Host:** Rabbit

**Clonality:** polyclonal

**Purity:** Purified from serum

**Format:** Liquid

**Preservative:** no

**Constituents:** PBS (without Mg<sup>2+</sup> and Ca<sup>2+</sup>), pH 7.4, 150 mM NaCl, 50% glycerol

**Species Reactivity:** detects SUMO-1 but not SUMO-2/3 from vertebrates.

**Storage Conditions:** Store at -20°C. Avoid freeze / thaw cycles

**Western blot:**

Western blot analysis of over-expressed SUMO-1 proteins. HEK293 cells were transfected with SUMO-1 (lane 2) and SUMO-2 (lane 3) cDNAs and control empty vector (lane 1). Cell lysates were blotted with anti-SUMO-1 rabbit polyclonal antibody (Cat. # 21236).
